

REMARKS

Amendments to Claims 1-25 were made primarily as a matter of style, and should require very little of the Examiner's time for consideration. In particular, the amended dependent Claims 2-25 more accurately reflect the statutory class of the associated independent Claim 1.

Claims 52-98 were added. These new claims constitute similar subject matter disclosed in the original specification and claims. For example, new independent Claim 52 recites a computer readable storage medium having instructions characterized by the same functional limitations recited in Claim 1, and Claim 24 recites the computational component recited in Claim 1 as comprising a computer readable storage medium. Similarly, new independent Claim 76 recites a logic circuit having the same functional limitations recited in Claim 1, and Claim 25 recites the computational component recited in Claim 1 as comprising a logic circuit.

Should any issues remain, the Examiner is encouraged to contact the undersigned agent.

Respectfully submitted,

Steven J. Shattil
